

In 1646, simple and complex machines were the driving force behind the bustling industry at the Saugus Iron Works.

In the pictures below, find these simple and complex machines at the Iron Works : Lever, Wheel & Axle, Pulley, Inclined Plane, Wedge, Gears.

Which simple machine could you not find in the above pictures? That's because it is not part of the machinery of the Iron Works. What job COULD this machine perform in the iron making process?
