

Thank you for helping us tidy up. Let us play with the whirligig that Father made for us. Then we will play Morrice too.

whirligig

Samuel, Father has to get some nails from the Iron Works and he is going to take us with him. It will be very noisy there. Do not get in the way of the workers. Now hop on the wagon and hang on!

Boys and girls, what do you think are the 4 important natural resources that are needed at an Iron Works?

WATER for power
and
transportation of
products

TREES to provide
charcoal for the
hot fires

BOG ORE that
contains iron

FLUX to help
separate the iron
from the bog ore
